

## ► R250D AND R250W - STANDARD PORT BALL VALVES

Ball valves R250D and R250W propose a large array of types of connections, with many control devices, with or without drain tap or sensor-holder. These valves have traditional balls with standard port installed.

### R250D

Chrome plated ball valve, female connections and lever handle. Standard port.

CE\* 1115 according to "PED" 97/23/CE directive
